## Committed to Sustainability

We are a 3rd generation family run company. We strive to make the highest quality, safest packaging in the most responsible way – for brands we’re really passionate about. Our sustainable options through our Earth-Guard brand offer structures with a more responsible end-of-life.

### POUCHES

Our bags come in versatile configurations, including 2-side seal, 3-side seal, and stand up side gusset quad seal pouches. These are accompanied by a variety of punch and hanging styles to cater to display and filling needs. They can also be customized with features such as reclosable zipper, tear notch, laser, and grease-resistant structures, complemented by a range of registered finishes.

### QUALITY

Our presses are equipped with 100% image inspection, ensuring your message and packaging are consistent throughout the entire run.

### LASER

Leveraging our cutting-edge laser technology, our products boast benefits such as easy opening, improved breathability, steam venting convenience, extended shelf life, and efficient peel and reseal capabilities. Additionally, they offer flexible variable coding options, integration of promotional codes, and the incorporation of dynamic bar & QR codes.

### SAFETY

We oversee the entire manufacturing process in-house, from start to finish. We source, test, and trace materials, ensuring full traceability from raw materials to finished goods. Supported by SQF certification.

### PACKAGING THAT SELLS

Our experienced team can analyze your current structure and design, and then help you create a package that sells. Contact us to learn how we can help your packaging perform better.

### LOCATION

Domestic supply. You'll know exactly where your product originates. In fact, you can come see us any time you want. You can rest assured we will stand behind our product to make sure you get the quality you expect and the packaging your fine products deserve.

### LET'S START A CONVERSATION

At Portco, we prioritize protecting our customer's products while manufacturing packaging in a way that minimizes our impact on the planet.
